CONTENTS

Tectonophysics Volume 164

Research papers

Computer simulation of growth of duplex structures
Cruikshank, K.M., Neavel, K.E. and Guo Zho Zhao (West Lafayette, Ind., U.S.A.) 1

Paleomagnetism of the Triassic red beds of the lower Fundy Group and Mesozoic tectonism of the Nova Scotia platform, Canada
Symons, D.T.A., Bormann, R.E. and Jans, R.P. (Windsor, Ont., Canada) 13

Seismicity and focal mechanisms at the New Britain Trench related to deformation of the lithosphere
Cooper, P. and Taylor, B. (Honolulu, Hawaii, U.S.A.) 25

Water, low-velocity zone and the descending lithosphere
Liu, L. (Canberra, A.C.T., Australia) 41

Metamorphosed and dismembered ophiolite suites in the basement units of the Eastern Alps
Neubauer, F. (Graz, Austria), Frisch, W., Schmerold, R. and Schlöser, H. (Tübingen, F.R.G.) 49

Palynological evidence for the Quaternary rates of accumulation along the Dead Sea Rift and structural implications
Horowitz, A. (Tel Aviv, Israel) 63

Letter Section

Synthetic magnetic fabrics in a plasticene medium
Borradaile, G.J. and Puumala, M.A. (Thunder Bay, Ont., Canada) 73

Book Reviews

Chemistry and Physics of Terrestrial Planets by S.K. Saxena (Editor)—J.Adler 79

Applied Geophysics by D.S. Parasnis—P.V. Sharma 79

Applied Mathematics for Earth Scientists by T. Rikitake et al.—A. Tarantola 80

The Techniques of Modern Structural Geology, Vol. 2. *Folds and Fractures* by J.G. Ramsay and M.I. Huber—R.V. Amenta 81

Announcements 82

Errata 82

Special Issue on Heat Flow and Lithosphere Structure (edited by V. Čermák, L. Rybach and E.R. Decker)

Preface iii

On a more rigorous approach to geothermic problems
Beck, A.E. and Shen, P.Y. (London, Ont., Canada) 83

The heat flow–heat generation relationship: Implications for the nature of continential crust
Drury, M.J. (Ottawa, Ont., Canada) 93

Geothermal models and mantle rheology in Australia
Cull, J.P. (Clayton, Vic., Australia) 107

Maximum thickness of the lithosphere and heat flow of continents
Zorin, Yu.A. (Irkutsk, U.S.S.R.) 117

Variations in the lithosphere thickness and vertical neotectonic movements
Levi, K.G. (Irkutsk, U.S.S.R.) 121

Downward continuation of heat flow data
Mareschal, J.C., Hamdani, Y. (Montréal, Qué., Canada) and Jessup, D.M. (Houston, Tex., U.S.A.) 129

Geothermal model of the continental margins of eastern Canada
Bodri, B. (Budapest, Hungary) and Jessop, A.M. (Calgary, Alta., Canada) 139

Deep temperature distribution along three profiles crossing the Teisseyre–Tornquist tectonic zone in Poland
Čermák, V., Šafanda, J. (Prague, Czechoslovakia) and Guterch, A. (Warsaw, Poland) 151

Geothermal profiles of the lithosphere in Central Asia
Dorofeeva, R.P. and Lysak, S.V. (Irkutsk, U.S.S.R.) 165

Thermal state under the Tohoko Arc with consideration of crustal heat generation
Furukawa, Y. and Uyeda, S. (Tokyo, Japan) 175

Modeling of the geothermal history of the Okhotsk Sea lithosphere
Tuezov, I.K. and Epaneshnikov, V.D. (Khabarovsk, U.S.S.R.) 189
A hypothesis on the heat flow similarity between oceans and continents
Kono, Y. (Kanazawa, Japan) 203
Hydrological distortion of heat flow in sedimentary basins
Jessop, A.M. (Calgary, Alta., Canada) 211
Terrestrial heat flow and radiogenic heat production in Finland, the central Baltic Shield
Kukkonen, I.T. (Espoo, Finland) 219
Heat flow measurements in Ireland
Brock, A. (Galway, Ireland) 231
Temperature data in the subsurface of Belgium
Vandenberghe, N. and Fock, W. (Leuven, Belgium) 237
Heat flow density data from France and surrounding margins
Lucazeau, F. and Vasseur, G. (Montpellier, France) 251
An approach to the thermal field in northeastern Spain
Fernandez, M. and Banda, E. (Barcelona, Spain) 259
Interpretation of heat flow density of the Apennine chain, Italy
Mongelli, F., Zito, G., Ciaranfi, N. and Pieri, P. (Bari, Italy) 267
On the geothermal regime of the Moesian Platform and Getic Depression
Andreescu, M., Burst, D., Demetrescu, C., Ene, M. and Polonic, G. (Bucharest, Romania) 281
The evolution of the Pannonian Depression (Romanian sector) as derived from subsidence and heat flow data
Demetrescu, C. and Polonic, G. (Bucharest, Romania) 287
Heat flow measurements in the northern part of Honshu, Northeast Japan, using shallow holes
Nagao, T. (Ishikawa, Japan) and Uyeda, S. (Tokyo, Japan) 301
Heat flow, structure and evolution of the lithosphere of Mongolia
Khutorskoy, M.D. and Yarmoluk, V.V. (Moscow, U.S.S.R.) 315
Regional implications of heat flow of the Snake River Plain, Northwestern United States
Blackwell, D.D. (Dallas, Tex., U.S.A.) 323
Heat flow density values and paleoclimate determined from stochastic inversion of four temperature–depth profiles from the Superior Province of the Canadian Shield
Nielsen, S.B. (Aarhus, Denmark) and Beck, A.E. (London, Ont., Canada) 345
New evidence for the distribution of the electric conductivity in the Earth's crust and upper mantle in the Pannonian Basin as a "hotspot"
Ádám, A. (Sopron, Hungary), Landy, K. and Nagy, Z. (Budapest, Hungary). 361
Prospects and limitations of large-scale surface geothermal measurements
Oelsner, Chr. (Freiberg, G.D.R.) 369

Contents Volume 164 375
